### *Blueprint Reading One Day Seminar*

#### **Course Overview:**

This is an introductory course on the basic principles of blueprint reading. Attendees of this seminar will be able to understand mechanical drawings. Instruction includes lecture and practical examples.

#### **Who Should Take This Course:**

Technical managers, non-mechanical engineers, salesmen, and new hires. *Do not send drafters and mechanical designers!*

#### **Course Materials:**

Each participant in the course will be provided a bound set of notes that follow the program.

#### **Schedule (subject to change):**

8 AM	Introduction
9 AM	Drawings and Views
10 AM	Dimensions and Symbols
11 AM	Tolerances
12 PM	Lunch
1 PM	GD&T Part #1
2 PM	GD&T Part #2
3 PM	Other Types of Drawings: Assemblies, Weld, Electrical
4 PM	Wrap-Up with Questions
5 PM	Adjourn

#### **Instructor:**

Thomas Allsup is the Manager of Technology for Anida Technologies in Dallas, TX. Thomas has a BSME from Oklahoma State University and a MSME from University of Texas at Arlington. He has worked in "high tech" design and manufacturing for 20 years. For questions, contact Thomas Allsup at [tallsup@anidatech.com](mailto:tallsup@anidatech.com) or 972.480.0110.

#### **Cost:**

Total cost is \$1600 for one day seminar which includes onsite instructor and 12 sets of bound notes. Additional notes are \$50 each. After the course, the PowerPoint presentation on CD-ROM will be available for \$400.
